 P: 608-227-2040
 F: 608-831-1890

Features:

- Original amplifier design (**NOT** another vintage clone!)
- Digitally controlled fully analog signal path— minimalist audio circuit design yet robustly engineered
- Input/Output transformer coupled for the best possible CMRR in even the most demanding situations
- Gain from 18 to 70dB in 1dB steps accomplished with low-noise precision reed relays and 0.1% 25ppm temp co. mil-spec resistors for the purest gain structure and the most accurate recall and repeatability
- Switchable: Phantom (+48V), Polarity (0 or 180 degrees), Pad (-22dB), and Mute
- Seamlessly integrates with industry standard DAWs Digidesign® Pro Tools HD®, as well as ICON® control surfaces.
- Software remote control application (OSX)
- 259 internal user save/recall sessions
- Quick channel selection and grouping
- Fast, precision 3-LED headroom metering
- Ultra-clean double regulated power supply utilizing a custom designed toroidal power transformer with switchable taps for worldwide operation.
- Intuitive operation (Some remote controllable preamps are difficult to use, sometimes requiring the user to set IP addresses! Not with the Anima. Push a switch, turn a knob and go. Inspiration can't wait!)
- Rugged industrial design utilizing heavy-duty extruded aluminum and stainless steel.
- MSRP = \$6000

Additional Options:

- Additional 130V high voltage DPA microphone inputs
- Additional line output option per channel
- Additional High-Z (DI) input option per channel
